

# Continuative and Resumptive Aspect in Dutch

Maarten Bogaards<sup>1,2</sup>

<sup>1</sup> Leiden University Center  
for Linguistics (LUCL)

<sup>2</sup> NWO PhDs in the Humanities

# PhD project

‘Aspect in Languages without Aspect’ (NWO PhDs in the Humanities)

Supervisors: Sjef Barbiers (promotor) & Ronny Boogaart (co-promotor)

Viewpoint aspect in ‘aspect-rich’ and ‘aspect-poor’ languages

Mandarin Chinese (rich) & Dutch (poor) as case studies

Currently working on several types of viewpoint-aspectual constructions:

- ‘Progressive’ *aan het* + infinitive (Bogaards 2019a, 2020, submitted; Boogaart et al. 2022)
- ‘Resultative’ posture verb + participle, e.g. *staan opgestapeld* (Bogaards 2019b,c)
- ‘Prospective’ *op het punt staan (om) te* (Bogaards accepted-a; Fleischhauer & Bogaards 2022)
- ‘Ingressive’ constructions (Bogaards accepted-b)
- ‘Continuative’ and ‘resumptive’ constructions (this talk)

# PhD project

Currently working on several types of viewpoint-aspectual constructions:

- ‘Progressive’ *aan het* + infinitive (Bogaards 2019a, 2020, submitted; Boogaart et al. 2022)
- ‘Resultative’ posture verb + participle, e.g. *staan opgestapeld* (Bogaards 2019b,c)
- ‘Prospective’ *op het punt staan (om) te* (Bogaards accepted-a; Fleischhauer & Bogaards 2022)
- ‘Ingressive’ constructions (Bogaards accepted-b)
- ‘Continuative’ and ‘resumptive’ constructions (this talk)

Feeds into revision of *Algemene Nederlandse Spraakkunst* (ANS 3)

Chapter 30: Aspect (together with Ronny Boogaart)

# Continuative aspect

*Blijven* ‘to keep’, *door* ‘through’, *verder* ‘further’ and *voort* ‘forward’ (from Bogaards accepted-b)

(1) *Corona of niet, de huizenprijzen **blijven verder doorstijgen**.*

‘Corona or not, house prices continue to rise (lit. keep further through rise).’

(<https://www.cda.nl/actueel/nieuws/geef-jongeren-weer-kans-op-eigen-woning-met-forse-koperskorting>)

Seemingly interchangeable:

(2) *dat de huizenprijzen **blijven stijgen** / **verder stijgen** / **doorstijgen** / **voortstijgen***  
‘that house prices continue to rise’

**This talk:** Exploratory corpus study (*work-in-progress*)

**Aim:** Show that none of these expressions are only continuative

# Overview

1. Previous work
2. Viewpoint aspect
3. Corpus study
  - *Frequency measures*
  - *Viewpoint-aspectual interpretation*
  - *Restrictions on situation type*
4. Syntax and ‘stacking’
5. Conclusion

*Blijven* ‘to keep’  
*door* ‘through’  
*verder* ‘further’  
*voort* ‘forward’

*Blijven* ‘to keep’  
*door* ‘through’  
*verder* ‘further’  
*voort* ‘forward’

# Previous work

‘Phasal aspect distinctions’ (Dik & Hengeveld 1997:225):

BEGINNING—CONTINUATION—END

~ ‘Continuous’ (Dik & Hengeveld 1997) vs. ‘Continuative’ (e.g. Xiao & McEnery 2004)

Auxiliary + copula *blijven* ‘to keep’ (ANS2:975,1050-1; SoD VPs:1019-20)

(3) *Hij had zeker erge honger: hij bleef maar eten!*  
 ‘He must have been really hungry: he just kept on eating!’  
 (ANS2:975)

“*the not stopping of the situation denoted by the infinitive*” (ANS2:1050)

Blijven 'to keep'  
 door 'through'  
 verder 'further'  
 voort 'forward'

# Previous work

Auxiliary + copula *blijven* 'to keep' (ANS2:975,1050-1; SoD VPs:1019-20)

- (3) *Hij had zeker erge honger: hij **bleef** maar **eten**!*  
 'He must have been really hungry: he just kept on eating!'  
 (ANS2:975)

*“the not stopping  
 of the situation  
 denoted by the  
 infinitive”* (ANS2:1050)

- (4) *Hij liep hard weg, maar toen ik hem riep **bleef** hij toch **staan**.*  
 'He walked away quickly, but when I called him he did stop.'  
 (ANS2:975)

*“blijven staan  
 [...] also the  
 interpretation  
 ‘stop moving’”*  
 (ANS2:975)

*Blijven* ‘to keep’  
*door* ‘through’  
*verder* ‘further’  
*voort* ‘forward’

# Previous work

Auxiliary + copula *blijven* ‘to keep’ (ANS2:975, I050-1; SoD VPs: I019-20)

“*the not stopping of  
 the situation denoted  
 by the infinitive*”  
 (ANS2:I050)

“*blijven staan  
 [...] also the  
 interpretation  
 ‘stop moving’.*”  
 (ANS2:975)

Only *blijven*—not *door*, *verder*, *voort*

Only continuativity—not resumptivity

Blijven 'to keep'  
 door 'through'  
 verder 'further'  
 voort 'forward'

# Previous work

## Continuative

*“the **not stopping** of the situation denoted by the infinitive” (ANS2:1050)*

- (2) *dat de huizenprijzen **blijven** stijgen / **verder** stijgen / **doorstijgen** / **voortstijgen***  
 ‘that house prices continue to rise’

## Resumptive

*resuming a situation that **stopped previously***

- (5) *Ze stopte met lopen. Daarna liep ze **door** / **verder** / **voort** / **#bleef** ze lopen.*  
 ‘She stopped walking. Then she resumed/continued walking.’

Blijven 'to keep'  
 door 'through'  
 verder 'further'  
 voort 'forward'

# Previous work

## Continuative

“the *not stopping* of the situation denoted by the infinitive” (ANS2:1050)

(2) *dat de huizenprijzen **blijven** stijgen / **verder** stijgen / **doorstijgen** / **voortstijgen***

‘that house prices continue to rise’

## Resumptive

*resuming a situation that **stopped previously***

(5) *Ze stopte met lopen. Daarna liep ze **door** / **verder** / **voort** / #**bleef** ze lopen.*

‘She stopped walking. Then she resumed/continued walking.’

- ~ Has been called ‘interrupted continuation’ (Xiao & McEnery 2004), but this doesn’t work for the Dutch equivalent of *continue*
- ~ Overlap in form (English *continue*, Mandarin Chinese *-xiaqu*), but rather different aspectual structure

*Blijven* 'to keep'  
*door* 'through'  
*verder* 'further'  
*voort* 'forward'

# Viewpoint aspect

(Radical) Selection Theories of Aspect (Breu 1994; Bickel 1997; Sasse 2002:222-5; Croft 2012:49-52)

Viewpoint Aspect & Situation Aspect made up of the **same building blocks**:

- Temporal axis  $t$
- Temporal phases  $\phi / \neg\phi$
- Temporal boundaries  $\tau$

(Not the same as saying: All they consist of)

Viewpoint aspect adds **focus/salience** (e.g. Langacker 2008; Anthonissen et al. 2019)

# Viewpoint aspect

- Temporal axis  $t$
- Temporal phases  $\phi / \neg\phi$
- Temporal boundaries  $\tau$

*Blijven* 'to keep'  
*door* 'through'  
*verder* 'further'  
*voort* 'forward'

## Ingressive (*beginning*)

# Viewpoint aspect

- Temporal axis  $t$
- Temporal phases  $\phi / \neg\phi$
- Temporal boundaries  $\tau$

*Blijven* 'to keep'  
*door* 'through'  
*verder* 'further'  
*voort* 'forward'

## Egressive (stopping)

# Viewpoint aspect

- Temporal axis  $t$
- Temporal phases  $\phi / \neg\phi$
- Temporal boundaries  $\tau$

*Blijven* ‘to keep’  
*door* ‘through’  
*verder* ‘further’  
*voort* ‘forward’

## Continuative (keep on doing/being)

“the **not stopping** of the situation denoted by the infinitive” (ANS2:1050)

# Viewpoint aspect

- Temporal axis  $t$
- Temporal phases  $\phi / \neg\phi$
- Temporal boundaries  $\tau$

*Blijven* 'to keep'  
*door* 'through'  
*verder* 'further'  
*voort* 'forward'

## Resumptive (*resume doing*)

## Compare:

### Ingressive (*beginning*)

# Viewpoint aspect

- Temporal axis  $t$
- Temporal phases  $\phi / \neg\phi$
- Temporal boundaries  $\tau$

*Blijven* 'to keep'  
*door* 'through'  
*verder* 'further'  
*voort* 'forward'

## Resumptive (*resume doing*)

**Compare:**

## Continuative (*keep on being/doing*)

# Corpus study

*Blijven* 'to keep'  
*door* 'through'  
*verder* 'further'  
*voort* 'forward'

Exploratory: Simple queries in OpenSoNaR (Oostdijk et al. 2013)

$[blijven_{fin} V_{inf}]$ ;  $[V_{fin} door LET]$ ;  $[V_{fin} verder LET]$ ;  $[V_{fin} voort LET]$

Only main clause order; only tagged 'Netherlands'

Coded for:

- *Viewpoint-aspectual interpretation*
- *Restrictions on Situation Type*

*Blijven* ‘to keep’  
*door* ‘through’  
*verder* ‘further’  
*voort* ‘forward’

# Corpus study: *Frequency measures*

Tokens, types, TTR, hapaxes (figures after noise removal)

TTR = types/tokens, so higher = more diverse (1.0 = all different)

	tokens	types	TTR	hapaxes	
<i>blijven</i> $V_{inf}$	9,821	1,192	0.12	605	<b>most frequent</b>
$V_{fin}$ <i>door</i>	1,079	76	0.07	45	
$V_{fin}$ <i>verder</i>	893	114	0.13	66	
$V_{fin}$ <i>voort</i>	185	42	0.23	23	<b>most diverse</b>

Blijven 'to keep'  
 door 'through'  
 verder 'further'  
 voort 'forward'

# Corpus study: *Frequency measures*

Most frequent tokens ( $V_{\text{inf}}/V_{\text{fin}}$ )

	<i>blijven</i> $V_{\text{inf}}$	$V_{\text{fin}}$ <i>door</i>	$V_{\text{fin}}$ <i>verder</i>	$V_{\text{fin}}$ <i>voort</i>
1	<i>staan</i> 'stand'	<i>gaan</i> 'go'	<i>gaan</i> 'go'	<i>duren</i> 'last'
2	<i>hangen</i> 'hang'	<i>zetten</i> 'put'	<i>moeten</i> 'must'	<i>gaan</i> 'go'
3	<i>zitten</i> 'sit'	<i>lopen</i> 'walk'	<i>lopen</i> 'walk'	<i>leven</i> 'live'
4	<i>steken</i> 'stick'	<i>rijden</i> 'drive'	<i>lezen</i> 'read'	<i>schrijden</i> 'advance'
5	<i>bestaan</i> 'exist'	<i>moeten</i> 'must'	<i>vertellen</i> 'tell'	<i>kabbelen</i> 'babble'
	<b>stative</b>	<b>more dynamic, and with modals</b>		<b>mixed stative/dynamic</b>

# Corpus study: *Viewpoint-aspectual interpretation*

1. Continuative; 2. Resumptive; 3. Potentially Egressive/Ingressive

Blijven 'to keep'  
door 'through'  
verder 'further'  
voort 'forward'

## I. Continuative ('not stopping')

- (6) *Ik schat in dat het PGB echt nog wel even **blijft bestaan**.*  
'My guess is that the PGB will **continue to exist**.'  
(SoNaR WR-P-E-A-0004516538)
- (7) *De trambestuurder probeerde nog te stoppen, maar de tram **gleed door**.*  
'The tram driver tried to stop, but the tram **continued to slide**.'  
(SoNaR WR-P-P-G-0000028908)
- (8) *M'n vriendin was 4 weken verder dan ik. Ik kreeg de miskraam en zij **groeide verder**.*  
'My friend was 4 weeks further along than me. I miscarried and she **continued to grow**.'  
(SoNaR WR-P-E-A-0004516538)
- (9) *Hij is weliswaar overleden, maar de legende **leeft voort**.*  
'He did die, but the legend **lives on**.'  
(SoNaR WR-P-P-G-0000025781)

# Corpus study: *Viewpoint-aspectual interpretation*

1. Continuative; 2. Resumptive; 3. Potentially Egressive/Ingressive

Blijven 'to keep'  
door 'through'  
verder 'further'  
voort 'forward'

## 2. Resumptive ('not stopping any more')

(10) *Hij pakte zijn vork weer op en **at door**.*

'He picked up his fork again and **resumed eating**.'

(SoNaR WR-P-P-B-0000000136)

(11) *Bestuurder lesauto Zierikzee rijdt kind (9) aan, stapt uit om kind uit te schelden en **scheurt verder**.*

'Driver of training car Zierikzee drives into child (9), gets out to scream at child and **resumes driving**.'

(SoNaR WR-P-E-L-0000000580)

(12) *Ik struikelde, stond weer op en **rende voort**.*

'I tripped, got up again and **resumed running**.'

(SoNaR WR-P-P-B-0000000146)

# Corpus study: *Viewpoint-aspectual interpretation*

1. Continuative; 2. Resumptive; 3. Potentially Egressive/Ingressive

Blijven 'to keep'  
door 'through'  
verder 'further'  
voort 'forward'

## 3. Egressive/Ingressive ('stopping/starting')

(13) [Z]ij [schoof] achteruit, todat ze in de hoek **bleef staan** en keek hoe hij naderbij kwam.

'She moved backwards, until she **stopped** in the corner and watched him come closer.'

(SoNaR WR-P-P-B-0000000004)

(14) Jones' blik dwaalde door de kamer en **bleef rusten** op een primitief masker dat aan de wand hing.

'Jones' gaze wandered around the room and **stopped** on a primitive mask hanging on the wall.'

(SoNaR WR-P-P-B-0000000233)

Only possible with particular verbs: besides *staan* 'stand' (ANS2), also *zitten* 'sit', *liggen* 'lie', *hangen* 'hang', *haken* 'catch', *plakken* 'cling', *steken* 'stick', *rusten* 'rest'... and possibly more?

Posture verbs and 'halting movement' verbs

# Corpus study: *Viewpoint-aspectual interpretation*

1. Continuative; 2. Resumptive; 3. Potentially Egressive/Ingressive

Blijven 'to keep'  
door 'through'  
verder 'further'  
voort 'forward'

## 3. Egressive/Ingressive ('stopping/starting')

Particularly interesting variant with *staan* and extra  $V_{inf}$  (embedded progressive?):

(15) *Een Koreaan die op het trottoir aan de overkant liep, bleef staan kijken.*

'A Korean person walking on the sidewalk on the other side, **stopped/started to watch.**

(WR-P-P-B-0000000221)

 Continuative interpretation generally also available (if context allows)

Only possible with particular verbs: besides *staan* 'stand' (ANS2), also *zitten* 'sit', *liggen* 'lie', *hangen* 'hang', *haken* 'catch', *plakken* 'cling', *steken* 'stick', *rusten* 'rest'... and possibly more?

Posture verbs and 'halting movement' verbs

# Corpus study: *Viewpoint-aspectual interpretation*

## 1. Continuative; 2. Resumptive; 3. Potentially Egressive/Ingressive

- Interpretations unevenly distributed over the constructions
- For *door*, *verder*, *voort*: based on random sample of 100 items (excluding highly frequent combinations—e.g. *doorzetten*, *verder gaan*)

*Blijven* ‘to keep’  
*door* ‘through’  
*verder* ‘further’  
*voort* ‘forward’

	continuative	resumptive	potentially e-/ingressive	unclear
<i>blijven</i> $V_{\text{inf}}$	69%	0%	31%	n/a
$V_{\text{fin}}$ <i>door</i>	49%	46%	0%	5%
$V_{\text{fin}}$ <i>verder</i>	17%	74%	0%	9%
$V_{\text{fin}}$ <i>voort</i>	79%	11%	0%	10%

# Corpus study: *Viewpoint-aspectual interpretation*

## 1. Continuative; 2. Resumptive; 3. Potentially Egressive/Ingressive

- Interpretations unevenly distributed over the constructions
- For *door*, *verder*, *voort*: based on random sample of 100 items (excluding highly frequent combinations—e.g. *doorzetten*, *verder gaan*)

*Blijven* ‘to keep’  
*door* ‘through’  
*verder* ‘further’  
*voort* ‘forward’

	continuative	resumptive	potentially e-/ingressive	unclear	
<i>blijven</i> $V_{\text{inf}}$	69%	0%	31%	n/a	
$V_{\text{fin}}$ <i>door</i>	49%	46%	0%	5%	<b>balanced</b>
$V_{\text{fin}}$ <i>verder</i>	17%	74%	0%	9%	<b>resumptive</b>
$V_{\text{fin}}$ <i>voort</i>	79%	11%	0%	10%	<b>continuative</b>

# Corpus study: *Restrictions on Situation Type*

Five-way taxonomy (Vendler 1967; Smith 1997)

*States, Activities, Accomplishments, Achievements, Semelfactives*

*Blijven* 'to keep'  
*door* 'through'  
*verder* 'further'  
*voort* 'forward'

## Restriction on Stativity

(6) *Ik schat in dat het PGB echt nog wel even **blijft bestaan**.*  
 'My guess is that the PGB will **continue to exist**.'

(SoNaR WR-P-E-A-0004516538)

(16) *dat het <\*verder> <\*door> <voort> **bestaat***

## Restriction on Incremental Telicity (Transitivity?) (ANS2:975)

(17) *[D]e landmeter verdrinkt uiteindelijk slechts omdat Lander **hem** er **blijft induwen**.*  
 'The surveyor eventually only drowns because Lender keeps pushing him in.'

(SoNaR WR-P-P-B-0000000365)

(18) *omdat Lander hem er <\*verder> <\*door> <\*voort> **induw**t*

# Corpus study: *Restrictions on Situation Type*

Five-way taxonomy (Vendler 1967; Smith 1997)

*States, Activities, Accomplishments, Achievements, Semelfactives*

- Expectation: Mainly Activities/Semelfactives
- Based on random sample of 100 items (again, excluding highly frequent combinations)

Blijven 'to keep'  
door 'through'  
verder 'further'  
voort 'forward'

## Restriction on Stativity

(6) *Ik schat in dat het PGB echt nog wel even **blijft bestaan**.*  
'My guess is that the PGB will **continue to exist**.'

(SoNaR WR-P-E-A-0004516538)

(16) *dat het <\*verder> <\*door> <voort> **bestaat***

## Restriction on Incremental Telicity (Transitivity?) (ANS2:975)

(17) *[D]e landmeter verdrinkt uiteindelijk slechts omdat Lander **hem er blijft induwen**.*  
'The surveyor eventually only drowns because Lender keeps pushing him in.'

(SoNaR WR-P-P-B-0000000365)

(18) *omdat Lander hem er <\*verder> <\*door> <\*voort> **induw**t*

# Corpus study: *Restrictions on Situation Type*

Five-way taxonomy (Vendler 1967; Smith 1997)

*States, Activities, Accomplishments, Achievements, Semelfactives*

- Expectation: Mainly Activities/Semelfactives
- Based on random sample of 100 items (again, excluding highly frequent combinations)

Blijven 'to keep'  
 door 'through'  
 verder 'further'  
 voort 'forward'

**Combination with modals: Only resumptive (unrealized)**

(19) We **moeten/willen/kunnen** <verder> <door> <voort>  
 'We have to/want to/can continue.'

# Corpus study: *Restrictions on Situation Type*

Five-way taxonomy (Vendler 1967; Smith 1997)

*States, Activities, Accomplishments, Achievements, Semelfactives*

- Expectation: Mainly Activities/Semelfactives
- Based on random sample of 100 items (again, excluding highly frequent combinations)

*Blijven* ‘to keep’  
*door* ‘through’  
*verder* ‘further’  
*voort* ‘forward’

	STA	ACT	ACC	ACH	SEM	Modal
<i>blijven</i> $V_{inf}$	28%	63%	4%	4%	3%	0%
$V_{fin}$ <i>door</i>	0%	76%	0%	0%	6%	18%
$V_{fin}$ <i>verder</i>	0%	84%	0%	0%	1%	15%
$V_{fin}$ <i>voort</i>	21%	75%	0%	0%	2%	2%

# Corpus study: *Restrictions on Situation Type*

Five-way taxonomy (Vendler 1967; Smith 1997)

*States, Activities, Accomplishments, Achievements, Semelfactives*

- Expectation: Mainly Activities/Semelfactives
- Based on random sample of 100 items (again, excluding highly frequent combinations)

*Blijven* ‘to keep’  
*door* ‘through’  
*verder* ‘further’  
*voort* ‘forward’

	STA	ACT	ACC	ACH	SEM	Modal
<i>blijven</i> $V_{inf}$	28%	63%	4%	4%	3%	0%
$V_{fin}$ <i>door</i>	0%	76%	0%	0%	6%	18%
$V_{fin}$ <i>verder</i>	0%	84%	0%	0%	1%	15%
$V_{fin}$ <i>voort</i>	21%	75%	0%	0%	2%	2%

***all except modals***

***exclude stative/telic,  
frequent modals***

***only excludes telic,  
modals less frequent***

*Blijven* ‘to keep’  
*door* ‘through’  
*verder* ‘further’  
*voort* ‘forward’

# Syntax and ‘stacking’

Example with ‘stacking’ from before:

- (1) *Corona of niet, de huizenprijzen blijven verder doorstijgen.*  
 ‘Corona or not, house prices continue to rise (lit. keep further through rise).’  
 (<https://www.cda.nl/actueel/nieuws/geef-jongeren-weer-kans-op-eigen-woning-met-forse-koperskorting>)

**Hierarchy:** *verder* > *blijven* > *door/voort-V*

- (20) *dat de huizenprijzen verder <door> <voort> blijven <door> <voort> stijgen*  
 (21) ??*dat de huizenprijzen blijven verder stijgen*

*Door/voort* in complementary distribution with particle verbs (cf. Beliën 2008)

- (22) *dat hij <\*door> op <\*door> ruimt* (Intended: ‘that he continues cleaning up.’)

If *blijven* takes scope over *door/voort*, limited to continuative interpretation:

- (23) *dat ze blijft <door> <voort> gaan* ‘that she keeps on doing (it)’

What if *verder* takes scope over *blijven*, as in (1)? Both continuative and resumptive?

*Blijven* ‘to keep’  
*door* ‘through’  
*verder* ‘further’  
*voort* ‘forward’

# Conclusion

‘Continuative’ constructions are not limited to continuative interpretations

- *Blijven* is continuative (‘not stopping’) and—with certain verbs—egressive/ingressive (stop/start)
- *Verder*, *door* and *voort* are both continuative and resumptive (‘not stopping any more’), but preferences vary strongly

*Blijven*, *verder*, *door* and *voort* also vary in their restrictions on situation type  
 (Can these be derived in a Selection Theory of Viewpoint Aspect?)

How frequent are the associations continuative—egressive/ingressive  
 and continuative—resumptive crosslinguistically?

Why are these notions expressed by the same form in English, Dutch and Mandarin?

# Thank you for your attention!
